

## WHAT \$10 DID FOR THIS WOMAN

The Price She Paid for Lydia E. Pinkham's Vegetable Compound Which Brought Good Health.

Danville, Va.—"I have only spent ten dollars on your medicine and I feel so much better than I did when the doctor was treating me. I don't suffer any bearing down pains at all now and I sleep well. I cannot say enough for Lydia E. Pinkham's Vegetable Compound and Liver Pills as they have done so much for me. I am enjoying good health now and owe it all to your remedies. I take pleasure in telling my friends and neighbors about them."—Mrs. MATTIE HALEY, 501 Colquhoun Street, Danville, Va.

No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

## Better Sight—Less Annoyance

Toric Lenses give a larger field of clear vision, and their curved shape makes them appear very much neater than flat lenses. Your eyes will not touch them, nor will you find any near reflections to confuse and annoy. Let us explain their many advantages to you.

## SUEOKA FAINTS, LATER TELLS OF MUCH THIEVING

Nine Employees of Hackfeld & Co. Held By Police Pending Further Investigation

An early visit to the drygoods department of H. Hackfeld & Company on Friday morning by a Chinese emigrant of the company's warehouse on the beach road, and a subsequent exit a few minutes later with a bundle of nine trusted employees of the firm on charges of plundering the drygoods and merchandise departments in a systematic series of robberies extending over several months.

Early Friday morning a Japanese employee noticed this Chinese boy leaving the main building with a bundle under his arm. Knowing that the Chinese is employed at the oil warehouse on the beach road, the Japanese became suspicious and later voiced his suspicions to his foreman, also a Japanese. The latter told Manager August Humburg of the merchandise department.

On a pretext of going for oil for his automobile, Mr. Humburg drove his machine to the warehouse and while the Chinese and Peter Frank, the two employees at the warehouse, were attending to his machine, Mr. Humburg slipped into the building and searched the open wardrobe lockers. In one he found a bundle of clothing that he described by the Japanese. He tore a hole in the paper covering and saw that it contained cloth such as is used for men's clothing and suits.

Humburg then drove away in his machine and called on Captain of Detectives McDuffie. The detective then had the Chinese boy brought before him. The latter said that Peter Frank had given him to him early that morning and had told him to take it to the oil warehouse. Later Peter Frank denied having given the Chinese anything, and protested his innocence.

H. Sueoka, another employee, was brought before the detective head and in the presence of Captain McDuffie Mr. Humburg questioned him. Sueoka denied everything, but while standing up and answering Mr. Humburg's questions, he started to quiver and shake. McDuffie noticed this and reached for Sueoka. Just as the Japanese fainted, McDuffie dashed cold water on the unconscious man, and when Sueoka recovered, McDuffie says, he confessed the robbery.

On Paqahi street, McDuffie found two cases of linen and lace and some underwear. The men occupying the room where the stuff was found said that J. K. Keoloha, a teamster of Hackfeld & Company, left it there just before Christmas. McDuffie recalls that another systematic robbery occurred at Hackfeld & Company about that time, but said today that at that time the company did not wish to prosecute and dropped the matter after discharging one employee.

A few days ago John Zablan, a laborer employed by the firm, called on a policeman at the latter's home or Dowsett Lane and asked if he could leave a suitcase there for a few days. The officer readily consented but when he heard that a robbery at Hackfeld & Company was under investigation, he broke open the suitcase and found suits and other new merchandise inside. Knowing that Zablan was an employee of the firm, he delivered the suitcase to the detective department.

The investigation is not yet at an end, Captain McDuffie said today. The nine men are now being held pending further investigation, and probably will be charged with first degree larceny. Those arrested are:

John Frank, Jr., shipping clerk;  
J. K. Keoloha and Thomas Kahue teamsters;  
Peter Frank, Manuel Frank, John Zablan, Sey Keng, H. Sueoka and Hoki Nishimura, laborers.

## SUBSTITUTE FOR BASHAM'S MIXTURE

In Treatment of Bright's Disease.

The Pharmacopoeia has had nothing to act directly upon renal tissues and reduce albuminuria in Bright's Disease. (Tyson on Bright's Disease, p. 156.) Hence, Basham's Mixture, a mild diuretic tonic, has been given, often with results in first stages, but in chronic forms with universal failure.

Note the new approach. Instead of stimulating the kidneys, results are now being had through a mild infusion acting directly upon and opposing granulation of the kidneys and strengthening the secreting renal cells. As a natural consequence albumen is commonly absorbed and casts decline, urinalysis having established the results in several thousand cases, many involving dropsy and some tapping. Analytical results cannot be questioned. The presence of albumen is a PHYSICAL FACT and its disappearance is a FACT IN PHYSICS.

The new agent, Fulton's Renal Compound, is a vegetable infusion (see formula with bottle). The motive being to oppose renal degeneration, the heart agents, eliminants, etc., given by physicians do not conflict, being continued if necessary. So mild that children take it. Thoroughly digested and assimilated. At Honolulu Drug Co., local agents. Literature mailed. John J. Fulton Co., 38 First St., San Francisco. Some analytical results can usually be looked for the third week.—Adv.

"With all this agitation, are you not afraid of the proletariat?" he asked. "No," replied the man who had made his pile in the war industry, "we drink only filtered water."—Philadelphia Public Ledger.

## SOLDIER CLAIMS AUTO THAT HURT HIM HURRIED ON

Robert Wenzel Says His Leg Was Twisted and Broken Until Bones Stuck Out

Coming from opposite directions, an automobile bound from Haleiwa for Schofield, and a motorcycle ridden by Robert Wenzel, chief mechanic of Battery F, 1st Field Artillery, passed so close to each other that Wenzel's left foot and leg were struck and broken by either the fender or the front wheel of the automobile Saturday.

Wenzel brought his machine to a stop. The automobile continued on its way, but another machine, driven by J. C. Hedemann, accompanied by Mr. and Mrs. Bruce Cartwright and Charles Lucas, picked up Wenzel and took him to Schofield Barracks hospital. Wenzel said the machine driven by either the Hedemann car was the one which struck him. Mr. Hedemann set the number of that car. He said it was automobile 2170, registered in the name of S. Decker.

Mr. Decker says that his son drove the car to Schofield from Haleiwa Saturday. Albert Decker, the son, denies having struck anyone. He says that he noticed Wenzel pass him on the motorcycle. He says that Wenzel's machine was wobbling and the driver appeared to be trying to stop. Wenzel says the machine crowded him to the left side of the road. Decker says that he was driving on the extreme right side of the road. Wenzel was taken to the department hospital at Fort Shafter this morning. He made the following statement today:

"The machine that struck me was being driven at a pretty fast clip in the direction of Schofield from Haleiwa. I met the machine a few hundred yards before it reached Kaula gulch. The driver was talking to the people in the back seat and apparently did not see me when I came out of the gulch or hear my horn. He was driving on the left of the road and crowded me so close to the edge when he passed me that his front wheel hub or front fender hit my left foot.

"I knew my leg was injured but did not know it was broken. I was not thrown out of balance and did not fall. I shut off the gasoline and looked down at my foot, which was turned around almost backwards with a bone sticking out of my ankle. It made me very faint and when I came to a stop I fell over with my machine on top of me.

"A machine about 300 yards in rear of the one that struck me stopped and kindly took me to the hospital at Schofield. I think they got the number of the machine that crowded me off the road, for after the races were over they came around to the hospital to see me and told me they had."

## COMMERCIAL NOTES

Manager Weber of Libue Plantation Company reports that the company will finish grinding today.

Koloa Sugar mill closed the grinding season on August 21 with an output greater by 1000 tons than that of any other year.

Kukaian Plantation Company will bring the 1915 harvest to a close this week with a record crop, according to word received by Theo. H. Davies & Company.

Two weeks more will see the end of the grinding season for the Onomea Sugar Company, according to a report made by Manager Mohr to C. Brewer & Company.

High winds and not enough rain during the last few weeks have delayed the planting of the 1917 crop on Kauai. So far the 1916 crop has not suffered from the dryness.

F. M. Swamy, manager of Theo. H. Davies & Company, has gone to the states for a vacation of three months. He will spend some time in the Canadian Rockies, and will probably go to New York.

Ewa Plantation finished its grinding season on August 20. As the drying off of the lower grades has not yet been completed no report of the output has been given out. E. D. Tenney thinks that the output will be lower than was estimated in January.

The McBryde Sugar Company will finish grinding on August 16 and the manager reports 458 tons more sugar than was anticipated in the January estimate. The total output, after all the low grades have been finished and the remnants dried off, will be 15,458 tons.

Paul Friedrichsen, manager of the German Potash Syndicate of San Francisco, who has been inspecting South Kona with a view to growing tobacco there extensively, is much pleased with the prospects for such an industry. Mr. Friedrichsen went to Maui from Hawaii to study the sugar industry.

The district of Kona seems the only part of the territory at the present time which is escaping the dry weather, that section being drenched daily with heavy rains. So far the 1916 sugar crop has not suffered noticeably but continued dry weather for a month or two will cause a cut in the 1917 yield.

Baker—Your parade of soldiers and sailors is gigantic and inspiring, but why are there no civilians in the street to witness it? Utopian—Ours is an up-to-date nation. We have no civilians.—Life.

## DELEGATES TO CONVENTION AT SEA ON PLANS

Charter Revision Body to Meet Next Week But Organization is Indefinite

Delegates to the coming charter revision convention are considerably at sea as to the arrangements for the meetings. The law does not specify a time or place for the convention other than that it meets the first Tuesday in September.

A number of delegates have talked over the plan of getting the use of one of the schoolhouses not too far from the center of the city. Otherwise it will probably be necessary to hire a hall, and as it is there are no funds for the convention's use. An attempt was made to secure the hall of representatives in the capitol, but it was found that a resolution passed by the legislature has set aside this hall for use only by the legislature or at a public reception at which the governor presides. The senate chamber often used for public gatherings, is now converted into the public works department office, and the supervisors' assembly hall is entirely too small. The number of delegates to the charter convention is 63, and at some of the sessions at least 50 are expected to be in attendance.

Several possibilities for chairman of the convention are being talked over. W. O. Smith is one of those most generally favored, as he is a veteran in legislative matters and is held in great respect. W. C. Achi has already declared his intention of nominating Mr. Smith. Former Supervisor M. C. Pacheco is strongly favored by some. It is felt that it would be a good thing to have a Democrat as chairman of the convention, in order somewhat to balance up the honors, as the majority of delegates are Republicans. Senator C. F. Chillingworth is also mentioned for chairman.

The convention will be held in the city hall, and some talk even of advocating the city manager plan.

While the law under which the convention is called does not specify anything about its organization, it is probable that the mayor will be asked to call the delegates to order and preside until a temporary chairman is selected.

The convention now has no assurance that funds will be provided, but the supervisors are expected to appropriate \$2000 for its use.

## FOOD SUPPLIES BY WILHELMINA

Henry May & Co., Ltd., will receive on the Wilhelmina fresh California fruit and vegetables and Puritan creamery butter. For the delicatessen counter there will arrive boiled ham, smoked beef, knackwurst, Ashland ham, head cheese, liver sausage, Westphalia sausage, blood tongue and an assortment of cheese in foil, glass and tins. Phone your order to 1271—advertisement.

## SURPRISES HEARERS BY TELLING WHO ARE "PROHIBITION CRANKS"

"Prohibition Cranks: Who Are They and What Makes Them Cranky" was the subject of a stirring address delivered yesterday morning in the First Methodist Episcopal church by John W. Wadman, D. D., superintendent of the Anti-Saloon League.

Dr. Wadman surprised his audience by the statement that prohibition cranks are not the men who preach prohibition from the pulpits, nor the women who wear W. C. T. U. badges, and those who work for temperance. He showed an entirely different class of people, who, he said, were prohibition cranks.

Among the list suggested by Dr. Wadman were the superintendents of the great railroad systems of America, who keep careful watch in order to discourage the use of liquor among employees; the managers of great industrial corporations; the standard life insurance companies; the fraternal orders; the great nation of Russia, which has driven out vodka; and last the liquor dealers themselves, who do not want employees that are victims of the drink habit.

## BIG FLOW OF WATER IN EXCAVATION FOR STAR-BULLETIN HOME

When laborers on the excavation being made for the Queen street entrance of the new building being erected for the Star-Bulletin on Queen street went to work this morning, they found four feet of water in the big pit.

A five-inch centrifugal pump, attached to a 15 horsepower electric motor and connected by pipes to the water, soon had the surplus water rapidly decreasing. The pump was put to work at 7 o'clock, and by 8:20 the entire force of laborers was back at work in the bottom of the pit.

Water seepage is not a new thing to construction companies who work in the lower end of town. That the water comes down from the hills is the general opinion. That it is brackish and of a muddy color is probably due to the fact that it passes for a considerable distance over a layer of coral.

Work on the Star-Bulletin building is progressing nicely, according to the Spalding Construction Company, which has the contract. The big derrick for the distribution of concrete has been erected, and a few more days will see the work materially hastened. It is the plan to have the building completed in about four months.

## COPIES OF GOSPELS IN MANY LANGUAGES READY FOR SAILORS

Printed in half a dozen languages, especially for Oriental sailors, several thousand copies of the Gospels—Matthew, Mark, Luke and John—are piled up in the office of the Seamen's Institute in readiness for the winter's work.

Practically every Oriental language is represented in the pile of booklets. Among the tongues in which they are printed are Mandarin Chinese, Urdu (an Indian dialect used by Lascars), Wenzli, another Chinese dialect; Japanese and numerous others.

New Testaments and tracts printed in Japanese are also present in large quantities, having been supplied to the Seamen's Institute by the Honolulu branch of the American Bible Society. The Japanese Mission, Japanese Y. M. C. A. and Rev. Fukao, have cooperated in supplying the Japanese tracts, so that religious work among Oriental sailors here this winter will be active.

David Helasco was arrested by the beat at Asbury Park, N. J.

You'll have to light-up in the afternoon---pretty soon---as the season-of-short days is rapidly approaching.

How many "dead" lamps?  
How many sockets out of order?  
How much display space unlit?

Any repairs or improvements to your lighting display should be done NOW, while there is time to do the work properly.

Wiring, re-wiring, repairing, remodeling, adding lights, replacing "dead" lamps—all should be attended to right away.

**The Hawaiian Electric Co., Ltd.**

## YOU CAN TAKE ADVANTAGE OF THIS

We furnish tables, chairs and every equipment for social gatherings of all kinds, as well as the necessary

## ICE CREAM, CONFECTIONS, ETC.

For select parties we have special ice cream moulds of many designs, initial moulds, card characters, etc., for distinctive service. These moulds are serving as place cards at many social functions. Our products are the best and the prices are lower. Bear us in mind when preparing for that next entertainment. We also maintain an excellent cafe. Try it for your meals.
